1.2.6. When a competition is combined, e.g. Junior and U23, U15 and U17, a Lifter may only compete in one age group category. The Lifter can select which age group they want to enter but may only enter in one age group category not numerous ones.

1.2.7. BWL reserve the right to run any of their competitions and events in any sequence of body weight categories and /or gender, in the interests of delivering a fair and interesting competition to best fit the overall needs of the competition as well as, the needs of the Lifters as BWL in its sole discretion sees fit.

2. THE TWOLIFTS

2.1. General

In the sport of Olympic Weightlifting BWL recognises two (2) lifts which must be executed in the following sequence:

- a) The Snatch
- b) The Clean & Jerk

Both lifts must be executed with two hands. A maximum of three (3) attempts is allowed in each lift in competition.

2.2. The Snatch

The barbell is centred horizontally on the competition platform. The Lifter takes the start position behind the barbell facing the officials. The Lifter grips the barbell and bends at the knees. The barbell is gripped, palms downward and pulled in a single movement from the platform to the full extent of both arms above the head, while either splitting or bending the legs. During this continuous movement, upward the barbell remains close to the body and may slide along the legs. No part of the body other than the feet may touch the platform during the execution of the Snatch. The Lifter may recover in their own time, either from a split or a squat position. The lifted weight must be maintained in the final motionless position, with both arms and legs fully extended and feet on the same line and parallel to the plane of the trunk and the barbell. The Lifter waits for the Referees' signal to replace the barbell on the competition platform. The Referees give the signal to lower the barbell as soon as the Lifter becomes motionless in all parts of the body.

2.3. The Clean & Jerk

2.3.1. The first part, the Clean:

The barbell is centred horizontally on the competition platform. The Lifter takes the start position behind the barbell facing the officials. The Lifter grips the barbell and bends at the knees. The barbell is gripped, palms downwards and pulled in a single movement from the platform to the shoulders, while either splitting or bending the legs. During this continuous movement, upward the barbell remains close to the body and may slide along the legs. The barbell must not touch the chest before it stops at the final position either on the clavicles, chest or on fully bent arms. The Lifter's feet must return to the same line and the legs must be fully extended before starting the Jerk. No part of the body other than the feet may touch the platform during the execution of the Clean. The Lifter may recover in their own time and must finish with the feet on the same line and parallel to the plane of the trunk and the barbell.

2.3.2. The second part, the Jerk:

The lifter must become motionless after the clean and before starting the jerk. The lifter bends and then dynamically extends the legs to move the barbell upwards in one motion to the full extension of the arms while lowering the body under the barbell and either splitting or bending the legs. The lifter then returns the feet to the same line parallel to the plane of the trunk and the barbell with both arms and legs fully extended. The lifter waits for the referees' signal to replace the barbell on the competition platform. The Referees give the signal to lower the barbell as soon as the Lifter becomes motionless in all parts of the body.

Before the Jerk, the Lifter may adjust the position of the barbell for the following reasons:

- a) To withdraw or “unhook” the thumbs
- b) If breathing is impeded
- c) If the barbell causes pain
- d) To change the width of the grip

The barbell adjustments noted above are not considered to be an additional attempt at the Jerk.

2.4. General Rules for all Lifts

2.4.1. The technique known as the hook grip is permitted. It consists of covering the last joint of the thumb with the other fingers of the same hand at the moment of gripping the barbell.

2.4.2. In both lifts, the Referees must count as “No lift” any unfinished attempt in which the barbell has reached the height of the knees

2.4.3. After the Referees’ signal to lower the barbell, the Lifter must lower it in front of the body. The grip on the barbell must only be released when it has passed below the level of the shoulders.

2.4.4.A Lifter who, for any reason, cannot fully extend the elbow(s), must report/display this fact to all on- duty Referees as well as the Jury prior to the start of each lift. This is the sole responsibility of the Lifter.

2.4.5. When snatching or cleaning in the squat style, the Lifter may assist their recovery by swinging, rocking or bouncing their body while in the squat position.

2.4.6. The use of chalk (magnesium carbonate) is permitted.

2.4.7. The use of grease, oil, water, talcum or any other lubricant on the Lifter’s body is forbidden. A Lifter who uses forbidden lubricant(s) is ordered to remove it immediately. If during the removal, the clock is running for that Lifter, the clock remains running.

2.4.8. Only the Lifter or the Loaders can move the barbell to a new position on the competition platform during competition. It is forbidden for a Club Official or Coach to move, adjust or clean the barbell.

2.4.9. It is the sole responsibility of the Lifter to complete each lift in accordance with the BWL TCRR and to the satisfaction of the on-duty Technical Officials.

2.4.10 When the competition clock has started for an attempt, the only person allowed on the competition platform is the lifter who has been called.

2.5. Incorrect Movements

2.5.1. Incorrect movements for all lifts

- I. Pulling from the hang, defined as: stopping the upward movement of the barbell during the pull.
- II. Touching the platform with any part of the body other than the feet during the execution of the lift.
- III. Pause during the extension of the arms.

- II. Touching the thighs or the knees with the elbows or the upper arms.

2.5.3. Incorrect movements for the Jerk

- I. Any apparent effort to jerk which is not completed; including, lowering the body or bending the knees.
- II. Any deliberate oscillation of the barbell to gain advantage. The Lifter must become motionless before starting the jerk.

2.5.4. Incomplete movements and positions

- I. Uneven or incomplete extension of the arms at the completion of the lift.
- II. Failing to finish with the feet and the barbell in line and parallel to the plane of the trunk.
- III. Failing to fully extend the knees at the completion of the lift.

The TIS is a complex and integrated competition management application used to implement the running order of the competition as per these TCRR. There are several version of TIS which can be used, they may include:

3.3.6.I Referee Light System management software and the following hardware:

- The Referee Light System is the means by which Referees adjudicate the lifts.
- The Referee Light System consists of one (1) control box for each of the three (3) Referees. It may also include control boxes for the Timekeeper and Jury.
- Each of the Referees must give the "Down" signal by pressing a button for a 'Good Lift' or a 'No Lift' according to the function of the TIS and the relevant competition rules. When two (2) of the Referees have provided identical decisions, a visual and audible 'Down' signal is given to the lifter to replace the barbell on the competition platform.
- Immediately after a majority decision; the referees decision must be displayed clearly to the lifter, the referees and the audience, indicating the individual decision of the referees by corresponding colours to their location relative to the platform.
- The decision must be visible for a minimum of three (3) seconds.
- After the visible and audible "Down" signal the Referees have a three (3) second window to reverse their decision. If a referee does not use an electronic TIS to display a changed decision within the three (3) seconds, they can still overturn their decision using a manual signal such as a flag or hand signal.
- When the "Down" signal has been given and the decision is displayed and the Lifter does not lower the barbell, the centre referee must verbally and physically instruct the lifter to lower the barbell.
- During the competition, a Jury may monitor the work of the Referees. Every decision by the referees may be identified for immediate further actions. Should the jury wish to call any of the referees to the jury table they will verbally instruct the referee(s) to attend the jury table.

3.3.6.II Communication System

- The TIS may provide a direct link between the Marshal table and the Speaker to relay attempt changes and instructions from the warm up room. If the TIS does not provide this directly an appropriate alternative should be implemented such as radios or a telephone.
- The TIS may also provide a direct link between the Technical Controller, Competition Management Table and the Jury. If the TIS does not provide a direct communication link between the Technical Controller, Competition Management Table and the Jury an alternative measure should be implemented such as radios or a telephone.

3.3.6.III Timing Clock

- The TIS may include an electronic timing clock with countdown mode. Increments of one (1) second must be used.
- The timing clock must be able to be set to any time up to fifteen (15) minutes. If the TIS does not provide a timing clock an alternative appropriate measure must be implemented.

3.3.6.IV Attempt Board

3.3.6.IV.1 The TIS may include an attempts display. The following information should be displayed on the Attempt Board when present:

- Lifter name
- Weight to be taken
- Attempt number

- Timing clock, if not displayed elsewhere

3.3.6.V Scoreboard

The TIS may include an integrated scoreboard. This must be set up in a prominent place in the FOP to record and display the progress and results of the specific category as it takes place. If the TIS does not include an integrated scoreboard an appropriate alternative measure must be implemented. The scoreboard should display the following information:

- Lifter lot number, in numerical order

6.4.18. A Lifter who is under or over their officially entered bodyweight category may return to the weigh-in room as many times as necessary to make the bodyweight category. The returning Lifter does not have to follow the sequence of weigh-in order.

6.4.19. At tier 3 events, lifters were originally entered and on the start list but who do not attend their weigh in, may at the discretion of the organiser weigh in and compete as a guest alongside another group. Guest totals do not count towards placings in competition but can be used for qualifications, records and rankings.

6.4.20.I At Tier 1 and 2 events lifters who fail to weigh within the limits of their declared bodyweight category may not compete.

6.4.20.II At Tier 3 events lifters who fail to weigh within the limits of their declared bodyweight category may be entered into another bodyweight category at the discretion of the organiser.

6.4.21. During the Weigh-In, the Lifter's Coach or Lifter must acknowledge and submit the starting attempts in both the Snatch and Clean & Jerk, with reference to the 20kg rule and the lifters bodyweight, either by way of an integrated TIS, other electronic method, or lifters card. Any subsequent changes to the declared starting attempts are considered part of the two (2) allocated weight changes.

6.4.22. The Protocol is made available to all concerned parties, as soon as possible upon the completion of the Weigh-In.

6.5. Introduction and Call Times

6.5.1. To ensure a timely competition schedule lifters must be ready for presentation according to the following call times:

- 20 minutes before first lift - Lifters must be present in warm up room and not leave before the presentation is complete
- 15 minutes before the first lift - Lifters will be marshalled for presentation and must not leave the warm up room
- 10 minutes before the first lift - Lifters will be presented to the spectators.

The following presentations may also be made, at the discretion of the organiser:

6.5.1.1 The competitors of the category or group are presented in ascending lot number order. Should any competitor not be present for the formal introduction, they will be requested to explain their absence to the Competition Director who will determine the appropriate warning or further action.

6.5.1.2 Technical Officials of the competition are then presented or announced in the following order:

- Chief Referee
- Side Referees
- Time Keeper
- Technical Controller(s)
- Competition Doctor(s)
- Jury (introduced whilst in their seats)

6.6. Course of the Competition

6.6.1. The barbell is loaded in progression. The Lifter requesting the lightest weight lifts first. Once the announced weight is loaded on the barbell, and the clock has started, the weight cannot be reduced. The Lifter or Coach must therefore observe the progression of the loading and be ready to make the attempt at the weight they have chosen. This is the sole responsibility of the Lifter/Coach. In case of any mistake occurring in the lifting order, either by fault of the lifter/coach/technical official, the final classification of lifters is decided by what the order of lifting should have been if the sequence had been correct.

6.6.2. Decision making process for attempts with loading errors:

I. If the barbell is loaded to a lighter weight than the one requested by the Lifter, the Lifter may, if he/she wishes, either accept the attempt if it was successful and provided the barbell was loaded to a multiple of 1 kg, or refuse it. If he/she refuses the attempt, the Lifter is granted an additional attempt with the weight originally requested.

6.6.2. Decision making process for attempts with loading errors:

- I. If the barbell is loaded to a lighter weight than the one requested by the Lifter, the Lifter may, if he/she wishes, either accept the attempt if it was successful and provided the barbell was loaded to a multiple of 1 kg, or refuse it. If he/she refuses the attempt, the Lifter is granted an additional attempt with the weight originally requested
- II. If the barbell is loaded to a heavier weight than the one requested by the Lifter, the Lifter may, if he/she wishes can accept the attempt if it was successful and provided the barbell was loaded to a multiple of 1kg. If the attempt is not successful or if the barbell is not a multiple of 1 kg, the Lifter is automatically granted an additional attempt with the weight originally requested.

6.6.3. The weight of the barbell must always be a multiple of one (1) kg.

6.6.4. The automatic progression after any successful attempt for the same Lifter must be a minimum of one (1) kilogram. If the lift is unsuccessful the weight on the barbell automatically remains the same.

6.6.5. The minimum weights that can be lifted at BWL Events are:

- Men = twenty-six (26) kg (20kg bar, 2.5kg collars, and two 0.5kg discs)
- Women = twenty- one (21) kg (15kg bar, 2.5kg collars and two 0.5 kg discs)
- U12 and below = ten (10) kg (5 kg bar, spring collars and two 2.5 kg full size discs)

6.6.6. The total weight of the starting attempts declared and taken in the Snatch and the Clean & Jerk cannot be less than twenty (20) kg below the verified entry total. The Technical Controller will exclude the Lifter from the competition if this rule is not adhered to. The above rule is commonly referred to as the "20 Kilo Rule" and will be applied as stated in the most current IWF rules.

6.6.7. Calling Order

6.6.7.1 The following four (4) factors listed in priority must be considered when calling the Lifters:

- The weight of the barbell (lightest weight first)
- The number of the attempt (lowest number first)
- The sequence/order of the previous attempt(s) (the Lifter who lifted earliest is first)
- The lot number of the Lifter (lowest first)

6.6.8. Each lifter is allocated one (1) minute in which to start their attempt. The minute begins immediately after the Speak has finished calling the lifters name and attempt weight.

Lifters can submit changes to their attempted weight in the first 30 seconds after the timing clock is started for their attempt. Lifters cannot submit changes in the final 30 seconds after the timing clock is started for their own attempt.

When a Lifter attempts two (2) lifts in succession, they are allowed two (2) minutes (120 seconds) for the succeeding attempt. (For exception see 6.6.9)

Thirty (30) seconds before the end of the allocated time, a warning signal sounds. If at the end of the allocated time the Lifter has not raised the barbell from the competition platform to make the attempt, this attempt is declared "No lift" by the three (3) Referees.

The timing clock is started the moment the Speaker finishes the announcement of the attempt or when the barbell is loaded and the loaders have left the platform, whichever is last.

The clock is stopped the moment the bar leaves the platform at the start of the attempt. If the barbell does not pass the height of the lifters knees and is returned to the platform the clock will restart as this does not count as an attempt.

6.6.9. A Lifter is granted only one (1) minute if while taking two lifts in succession the calling order changes and the clock starts for another Lifter.

6.6.10. The weight announced by the Speaker must be immediately displayed on the Attempt Board.

6.6.11. When a Lifter wishes to increase or decrease the weight originally selected, the Coach / Lifter must notify the Chief Marshal. The change will then notified to the Competition Management Table by way of the TIS, or other communication method.

To increase the weight, the Coach / Lifter must submit the weight change before the thirty (30) second indicator (except TCRR 6.6.13).

An attempt cannot be lowered to a weight that has already been lifted by another lifter with a higher lot number unless for a later attempt number. i.e. a first attempt always precedes a second attempt regardless of lot number. An attempt cannot be lowered by a lifter if the clock has already started for their own attempt at a higher weight.

6.6.12 The thirty (30) second indicator is the signal given by the timing clock thirty (30) seconds before the end of the allocation time.

6.6.13. Between two attempts the Coach / Lifter must acknowledge and submit the next attempt weight at the Marshal Table; both for a declaration weight and automatic increment. This acknowledgment allows two (2) further changes within the lifters remaining time.

If the Coach / Lifter fail to do so before the thirty (30) second indicator, the Lifter will make their attempt according to the automatic progression.

When a Lifter is taking consecutive attempts (2 minutes allocated time), the Coach / Lifter must declare the next attempt within the first thirty (30) seconds after being called, even if it is the automatic increment.

Failure to do so will forfeit the two (2) changes allowed. The Lifter will then have to take the automatic increment.

6.6.14. When the Coach / Lifter asks for a change of weight and still has to take the heavier weight next, the clock is stopped while the weight is changed. After the change of weight has been completed, the clock continues to run.

When the Coach / Lifter asks for a change of weight and, in doing so changes the order to follow another Lifter, the normal one (1) minute (60 seconds) applies for the next attempt.

6.6.15. The Coach / Lifter must notify the Chief Marshal if they wish to withdraw from lifting either during the Snatch or the Clean & Jerk portions of the competition, or both. It must be noted and signed on the Lifter's Card that they are withdrawing from the respective lift.

Once the Lifter's Card has been signed the withdrawal is official and the Lifter cannot re-enter the competition in that respective lift. The Speaker then announces the withdrawal.

6.6.16. During competition only on-duty Technical Officials, authorised personnel, authorised Coaches (See TCRR 6.4) and Lifters of the specific group are allowed in the FOP.

6.6.17. Only two (2) Coaches are permitted to stand at the designated area/entrance of the competition platform/stage.

6.6.18. Visually impaired lifters may be accompanied to the back of the platform by a guide. The guide must then leave the platform (but not the stage) during the execution of the lift. The guide may then return to the platform to accompany the lifter from the stage. All guides must meet the requirements in TCRR 6.4.3 to be issued an accreditation pass.

6.6.19. It is the responsibility of the competition organiser that appropriate areas are staffed only by BWL Level 2 or above coaches and Technical Officials holding a valid licence and must be monitored during competition, in line with the BWL Safeguarding Policy.

6.7. Break

6.7.1. There is no break between the Snatch and the Clean & Jerk; unless there are six or less competitors, which case the Competition Director may insert a break in time between the two lifts at their discretion

6.7.2. There may be a ten (10) minute break between each group of competitors in line with the Introduction.

6.7.3. The Competition Director may shorten or lengthen the break. An appropriate announcement to all relevant parties (Lifters, Coaches, Technical Officials, sport production, broadcast, spectators, etc.) must be made.

6.8. Classification of Lifters and Teams

6.8.1. Lifter Classification

6.8.1.1 The title of Champion is awarded for the total of the individual lifts in the Snatch and the Clean & Jerk (the aggregate of the best Snatch and the best Clean & Jerk results). The Lifters who win first, second and third place in the total at all BWL events are awarded gold, silver and bronze medals, respectively. At Tier 1 and Tier 2 events medals are not awarded for the best Snatch lift and the best Clean & Jerk lift.

6.8.1.2 Where there are three or fewer lifters in a bodyweight category the 'minus one rule' may be applied. This means that one less medal will be awarded than there are competitors in the category. For example: if there are three lifters only two medals will be awarded. If the 'minus one rule' will be used at a competition, the organiser must clearly communicate this information to the entrants in advance of the event.

6.8.2. In order to be recognised as 'Champion' and be presented with a medal at Tier 1 and Tier 2 events, the total of the winning lifter must be equal to or higher than the qualification standard for the bodyweight category the lifter is competing in. If the winning lifters total is lower than the qualification standard they will be referred to as the winner but not the 'Champion', and they will not be presented with a medal and will not be eligible for a defending Champion place at the British and England Senior Championships, or any other applicable events.

6.8.3.I Factors to decide the classification of lifters in Snatch and Clean & Jerk:

best result – heaviest first; if identical, then:

earliest (chronological) successful attempt that results in the heaviest lift – lowest first; if identical, then:

previous attempt(s) – lowest first; if identical, then:

lot number – lowest first

6.8.3.II Factors to decide the classification of lifters in Total:

best result – heaviest total first; if identical, then:

earliest (chronological) successful clean & jerk attempt that results in the heaviest total; if identical, then:

best Clean & Jerk result attempt number: lowest first; if identical, then:

all previous attempts – lowest number of successful attempts first; if identical, then:

lot number – lowest first.

6.8.3.III The sequence / order of the competition applies when a bodyweight category is divided into multiple groups.

6.8.4 The winner or Champion of a competition is regarded as the defending winner or Champion until the next edition of the competition takes place.

6.8.5. Club Classification

6.8.5.1 General Criteria

6.8.5.1.I To be eligible for ranking in the Top Club competition a club must have at least one male and one female lifter achieve a total in the competition.

6.8.5.1.II When a lifter enters a competition the club they represent is automatically entered into the club competition provided TCR 6.8.3.II is met.

6.8.5.1.III The winner of a Top Club title holds the title until the next edition of the event takes place.

6.8.5.2 Club Representation

6.8.5.II.1. There is no limit on the number of lifters that can represent a club in a competition

6.8.5.II.2. Lifters can move from one club to another and score points for that club up to seven days before the competition

6.8.5.II.3. Unattached lifters cannot be a member of any club unless they join a club before the bodyweight category closing date of the competition and have updated their BARS membership profile.

6.8.5.II.4. A Lifter can change from club to unattached up until the end of weigh in for their competition.

6.8.5.3 Scoring Criteria

6.8.5.3.I. Only the top two ranked lifters per club can score points in a bodyweight category.

6.8.5.3.II. If three lifters from the same club score points, the points for the lowest ranked of the three do not count towards the clubs' total. This is repeated for any subsequent ranked lifters from the same club. These points are not reallocated to other lifters.

6.8.5.3.III Points will be awarded to the top 10 places in each bodyweight category as follows:

- 1st place 15 points
- 2nd place 12 points
- 3rd place 10 points
- 4th place 8 points
- 5th place 6 points
- 6th place 5 points
- 7th place 4 points
- 8th place 3 points
- 9th place 2 points
- 10th place 1 point

6.8.5. The club with the most total points from the competition is the winner.

6.8.6. In the event of two or more clubs finishing the competition with the same number of points the following factors will determine the winner:

1. The club who scored their points with the fewest number of lifters. If equal then;
2. The club with the highest aggregate place from their point scoring lifters. If equal then;
3. The club with highest Sinclair score when their top male and female lifters Sinclair scores are combined.

6.9. Victory Ceremony

6.9.1. At all BWL Events, after each bodyweight category, a Victory Ceremony is presented.

6.9.2. A podium with places for the three (3) medal winners is placed on the competition platform. The medal winners line up behind the podium.

6.9.3. The Speaker introduces the official(s) presenting the medals. Medals are only presented for the total.

6.9.4. Starting with the bronze medal, the Speaker announces alternately the name, the club and the result of the medal winners in the total. The Lifters mount the podium to receive their medal when they are called. The medal ceremony is continued with the silver medal and the gold medal.

6.9.5. During the Victory Ceremony, medal winners cannot be accompanied by any other persons unless the Lifter is visually impaired and requires a guide.

6.9.6. Participants of the Victory Ceremony must not use it for political, racial or religious demonstration.

7.6.12. When no referee light system is in place, after the ‘down’ signal the referees will show their decision using either red and white paddles or flags for a ‘no lift’ and ‘good lift’ respectively. If coloured paddles or flags are not available referees will show their decision by showing a ‘thumbs-down’ or ‘thumbs-up’ for a ‘no lift’ or ‘good lift’ respectively.

7.6.13. When no referee light system is in place if any of the referees sees an error during the execution of a lift they raise an arm to call attention to the fault. If one other referee also sees a fault and raises their arm this constitutes a majority decision and the centre referee must give the ‘down’ signal to end the lift.
