

**Event:** IWF Junior World Championships 2022

**Date:** 02-10 May 2021

**Location:** Heraklion (Crete)

### **Covid-19 and International threats to athlete safety**

*Due to the on-going challenges caused by Covid-19 and other challenges in the world landscape, the 2020 international weightlifting competition calendar remains very uncertain.*

*BWL feels strongly that any decision to send teams to international competitions in-light of the challenges around the world must be continually reviewed on a case by case basis. BWL will continue to review guidance shared by the British Government, UK Sport, Public Health organisations across the UK and other key stake holders to inform our understanding of the risks, challenges and restrictions across both the domestic and international landscape.*

*We appreciate this is a difficult and uncertain time for all of Britain's leading Weightlifters, but we ask you to respect that the health and safety of all athletes, support staff and their families will remain our main priority for any decisions made on the selection of GBR international competition teams while the challenges around Covid-19 and other challenges in the world landscape continue.*

*If at any stage BWL feel that the safety of athletes or staff could be at risk or insufficient information is available to inform our planning or decision making, then we reserve the right not to send a team to 'IWF World Youth Championships' with immediate notice.*

*All athletes who are provisionally selected will be asked to undergo a virtual 1-1 with the BWL talent manager to explore (1) the risks of Covid-19, (2) the opportunity to 'opt in or 'opt out' based on the information they hear during their 1-1. In the case of under 18s a Parent/Guardian must be present.*

## Appendix 1 – Calculating Annual Progress Rate

### What do you need to do?

Junior athletes should demonstrate minimum annual progress of  $\geq 103\%$  across the last 12 months prior to the selection deadline

Progress rates will be calculated from the best performance recorded at an IWF/EIF/BWL licensed competition 12-15 months prior to the qualification deadline for the international competition which the athlete is being considered for.

Annual Progress Rate is calculated using the formula;

$$\left( \frac{\text{Best competition performance during Selection Period}}{\text{Best competition performance during 12–15 months prior to the selection deadline}} \right) \times 100 = \text{Progress rate (\%)}$$

### Why do you need to do it?

To qualify for international competition athletes are expected to demonstrate progress rates which indicate that their performance trajectory is aligned to success at Olympic, Commonwealth, World and European Senior level.

## Appendix 2 – Calculating Average Number of successful lifts made in competition

### What do you need to do?

Athletes should make an average of  $\geq 4/6$  successful lifts in BWL/IWF/EIF competitions across the last 12 months prior to the selection deadline (or their last 4 competitions they have competed in, whichever is more recent)

Average number of successful lifts in competition is calculated using the following formula;

$$\left( \frac{\text{TOTAL Number of successful attempts in 4 Best competition performances}}{\text{TOTAL Number of attempts in 4 Best competition performances}} \right) \times 6 = \text{Average Success Ratio (/6)}$$

### Why do you need to make 4/6 lifts?

Consistently making  $>4/6$  lifts in domestic and international competitions with maximal loads is a measure of an athlete's reliability under competition pressures. Data suggests that 4/6 lifts is approximately the number of lifts by international medallists. Making 4/6 lifts demonstrates thoughtful, strategic decision making by the lifter and coaching team, which allows them to take advantage of field of play tactics which maximise an athlete's ranking.

	Snatch 1	Snatch 2	Snatch 3	Jerk 1	Jerk 2	Jerk 3	AVG Success Ratio
Total count	408	408	408	408	408	408	
Good lifts	332	294	224	353	294	185	<b>4.12 / 6 lifts</b>
No Lifts	76	114	184	55	114	223	
Success ratio	81%	72%	55%	87%	72%	45%	<b>68.71%</b>

Data from World & Olympic Medallists 2009-2019

### Why do BWL evaluate the number of lifts across 4 competitions?

Athletes should be capable of delivering maximal and near maximal performances a minimum of 4 times per year In-line with new Olympic and Commonwealth Qualification procedures. Success ratio in senior athletes is calculated from each athlete's 4 best competition performances across the 12-months prior to the selection deadline for each competition.
